

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

*a* Yellow fever reported; cases not given.

[Reports to the Supervising Surgeon-General United States Marine-Hospital Service.]

*Yellow fever in Mobile County outside the city.*

MOBILE, ALA., October 26, 1897.

SIR: I have the honor to forward a table showing the status of yellow fever in Mobile County outside of the city of Mobile up to and including to-day.

These cases are at places from which you are not liable to receive advices, and as they are all reported to the county health officer here I can and will report them to you by mail as they are recorded each day unless you wish to make other arrangements.

Some of these cases I have reported under the head of "outskirts;" they are located just outside of the city limits, which makes them belong to the county. All the other places named are recognized as such.

I have the honor to be, very respectfully,

IRA W. PORTER,  
Acting Assistant Surgeon, U. S. M. H. S.
